PROFESSIONAL SUMMARY

Backend Developer with production experience building and maintaining scalable backend systems using Node.js, Express.js, PostgreSQL, Redis, and Next.js. Contributed to two live SaaS products by joining existing codebases, delivering authentication, real-time features, caching, and secure APIs without disrupting production environments.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript
Backend	Node.js, Express.js, Next.js, REST APIs, Socket.io, Node-Cron, Stripe, Supabase
Frontend	React.js, HTML5, CSS3
Databases	PostgreSQL, MongoDB, Redis
ORMs	Prisma, Sequelize
Auth & Security	JWT, Bcrypt.js, RBAC, Helmet, Joi, Zod
Tools	Git, GitHub, Postman, Swagger, Aiven Cloud, Nodemailer

WORK EXPERIENCE

Backend Developer

Mar 2026 - Present

Kindlebit Solutions | Mohali, Punjab

- Built and maintained production backend for two live client platforms (Parkvil, YourBDM), delivering REST APIs, auth flows, and real-time features within existing codebases without disrupting live users.
- Reduced API response time on high-frequency endpoints by introducing Redis caching and optimizing Prisma and Sequelize queries on Aiven-hosted PostgreSQL.
- Built real-time notification pipelines with Socket.io, automated emails via Nodemailer, and scheduled background jobs with Node-Cron for event-driven operations.
- Hardened API security using Helmet, Joi and Zod validation, IP-based rate limiting, and a centralized error handler across both platforms.

Process Associate, Medical Billing

Feb 2025 - Feb 2026

5-Tek Medical India Pvt. Ltd. | Mohali

- Managed day-to-day billing operations while continuing to self-study backend development to transition back into software engineering.

Software Developer Associate (Internship)

Aug 2023 - Feb 2024

IT-ITeS Sector Skill Council

- Built RESTful APIs with Express.js, implemented JWT authentication with Bcrypt password hashing, and added Redis caching with rate limiting.

PROJECTS

Parkvil - Multi-Tenant SaaS Platform ([Live](#))

Tech Stack: Node.js, Prisma, PostgreSQL, Socket.io, Nodemailer, Stripe, Joi

- Joined mid-development and took ownership of backend modules for driver, owner, and admin onboarding, invitation management, and organization lifecycle workflows
- Implemented RBAC, email verification, account activation, IP-based rate limiting, and lockout policies - integrated into an active codebase without disrupting live features.
- Delivered RESTful APIs for user management, subscription seat-limit validation, and workflow automation while adapting quickly to the existing architecture.

YourBDM - Full Stack Business Platform ([Live](#))

Tech Stack: Next.js, Node.js, Supabase, PostgreSQL (Aiven), Zod, Nodemailer

- Joined mid-project and built end-to-end auth - signup, OTP email verification, protected callback routes, and Supabase redirect config using Next.js App Router and Supabase Auth
- Developed and maintained production REST APIs using Express.js with Aiven-hosted PostgreSQL, integrating backend services into an existing Next.js application.

EDUCATION

Master of Computer Applications (MCA)

2022 - 2024

Chandigarh University, Mohali

Bachelor of Science (BSc)

2018 - 2021

Dibrugarh University, Assam
